In BTP: the user uses the **“Manage Print Queues”** application to create print queues. This is the first step when configuring printing with BENS OMS PRINT HUB. The queues are configured to be accessible by the technical print users BENS_OMS_1 and BENS_OMS_2, as print queues can be processed by multiple OMS instances.

Pic. 03

BENS OMS Print Hub – Here the “**virtual printers**” can be conjured. Each *virtual printer* corresponds to a print queue in SAP and is assigned to another target (e.g. physical printer).

Pic. 04

BENS OMS Print Hub – a configuration file must be filled with appropriate data and stored for BENS OMS Print Hub to get the access to SAP BTP.

Pic. 05

BENS OMS Print Hub – the same configuration file as showed in Pic. 04 must be filled with data for queue- and print profiles configuration.

```

Pic. 12

The WEB based panel on the BENS OMS Print Hub provides a listing of queues configured on the SAP site. The print queue list provides basic information about each queue, including the mapping between SAP queues and BENS OMS printers and the print profile assigned to each queue, if configured.

BENS OMS PRINT HUB

The screenshot displays the SAP 'Manage Print Queues' interface. A 'Print Options' dialog box is open, showing settings for a print profile named 'profile01'. The dialog is divided into two main sections: 'Print Profiles' and 'Print Settings'.

Print Profiles:

- A print profile is a collection of saved settings
- Defaults
- profile01 (selected)

Print Settings:

- Copies: 1
- Color: yes
- Pages: All Pages
- Paper sizes: A4
- Paper source: Tray 1
- Print on sides: two-sided-long-edge
- Orientation: portrait
- Quality: High
- Resolution: 600

At the bottom of the dialog are buttons for 'Save As', 'Delete', and 'Close'.

The background interface shows a list of print queues (PRN01, PRN02, PRN03, PRN04) and a detailed view of the selected queue (PRN01) on the right, including its description, user, creation date, and status (Active).

Pic. 13

BENS OMS Print Hub supports print profiles edited in the SAP BTP.
