# RBarc/PDF417

2D-Barcode Add-on for SAP® Systems

Rbarc/PDF417 is an add-on for SAP® systems, allowing the on-the-fly encoding of data in 2-dimensional barcodes of the type PDF417.

- Short installation time (approx. 15 min. including all demo data).
- Installation on server side, only.
- No client components.
- No barcode modules needed for the printer.
- Any printer type may be used.
- Programmed as a Report in ABAP®.
- RBarc/PDF417 changes no SAP standards.
- RBarc/PDF417 is Unicode approved.
- The same technology for **SAPscript** as well as **Smart Forms** and **Interactive Forms**
- Output via any Host Spool Access Method is possible.
- Low data amount per barcode.
- High performance even with several barcodes per page.
- Documents with PDF417 can be printed, faxed, mailed, archived or converted into PDF.
- Easy encoding of function codes such as <RS>, <GS> and< EOT>.
- Accurate size determination with the accuracy of 1 dot
- Easy design of PDF417 labels for modern applications (e.g. VDA labels or postage stamps)
- Easy integration into existing forms (**SAPscript, Smart Forms** and **Interactive Forms)** .
- A detailed manual with implementation examples is available.
- A license includes the productive system as well as the relevant testing and consolidation systems.
- Up to 2710 digits or 1850 alfanumeric characters or 1100 bytes can be encoded.
- Reference list and offers available upon request

We offer free support for installation, testing and commissioning.
