

Versatile Deployment

- Print server and powerful output management system
- Meets requirements for print jobs, document, and printer management

Support for all Common Input and Output Channels

- Flexible integration via Port 515 (lpr), Port 9100 and above (raw), Hotfolder (Shares), IPP, email, and more

Unlimited Queues and Plugins

- Setup of an unlimited number of queues
- Plugins - Applications for processing print jobs, individually configurable for each queue

BENS G4 Turbo

- Hardware appliance for smaller environments with up to 50 printers
- Reliable solution without moving parts

BENS PP Spool

- Efficient solution for operators of production machines
- Individual print control and reprint capabilities

Customized Solutions

- Tailored plugins according to individual requirements
- Success stories at www.suchymips.de/en/about-us/case-studies

SAP Integration and Certifications

- Support for SAP BC-XOM specifications
- Certified plugins like BENS OMS and OMS/XOM Extension for Printer
- BENS as a SAP-certified Output Management System (OMS)

Master/Slave - Highest Stability and Redundancy

- BENS Master and BENS Slave operate simultaneously in the network
- BENS Master is the primary productive server
- In case of Master failure, the Slave takes over and notifies the administrator
- Once the issue is resolved, the Master resumes productive operation

Contact Us for Support

- Trial setup with first-class remote support
- Dedicated support during the trial phase

Easy Administration and Intuitive User Interface

- Web interface for simple administration
- User-friendly configuration and fine-tuning of output options

Virtualization and Scalability

- Available as a VM for vmware, Microsoft HyperV and other virtualisation platforms
- Customizable resource utilization for optimal performance
- Installation in the cloud (e.g., Azure Cloud or private cloud) or on-premise possible

Failover and Load-Balancing Modules

- Automatic printer switch in case of failures
- Even distribution of print jobs across multiple printers

Trial Version

- Trial version for virtual BENS servers available for download at www.suchymips.de/en/downloads

Compatibility and Efficiency for Diverse Requirements

- Support for PCL5, PCLXL, Postscript, PDF, ZPL, and more
- Label printing solutions for printers from Zebra, Epson, Toshiba, and other manufacturers

Global Deployment and Acceptance

- Over a thousand installations worldwide
- Trust from small offices to large global players like Mahle, E.ON, HiPP, Knorr, HeidelbergCement, Knorr-Bremse, Hella etc.

SAP Certified "Extension for Printer"

- Comfortable web interface for managing printers in SAP systems
- BENS as a SAP-certified Output Management System (OMS)
- Configurations, extensions, and changes are transferred to all defined SAP systems in one click

Security and Updates

- Regular security vulnerability checks with Nessus
- Quick deployment of free updates when needed
- Updates can usually be applied without operational interruption
