

## Self-committed environmental management system of Suchy MIPS GmbH

- In the office, all light sources have been replaced with LED lamps.
- Sensors automatically turn off the lights when they are no longer needed.
- The air conditioning is only turned on if the indoor temperature exceeds 26 degrees Celsius.
- Thermostats have been installed on all radiators to adjust the temperature to the indoor temperature and ensure nighttime cooling.
- We separate waste into paper, plastic, metal, organic, and residual waste.
- Wherever possible, we use recycled paper.
- The coffee machine has been set to automatically turn off after 15 minutes if not in use.
- We only eat and drink from porcelain and do not use disposable dishes.
- Business trips are only undertaken when personal contact is essential. In all other situations, we use remote communication. Software installations are generally carried out remotely.
- Personal computers that are expected to be unused for more than 30 minutes are turned off.
- Monitors are set to turn off after a certain period if there is no image change.
- All employees are committed to using the stairs instead of the elevator.
- When purchasing electrical and electronic devices, we pay attention to environmental labels such as the EU Ecolabel, Blue Angel, Energy Star, etc.
- For personal computers, we only use energy-efficient laptops with minimal power consumption and appropriately matched power supplies.
- Printers are operated in ECO mode for tests.
- The WLAN is turned off outside of office hours.
- We have agreed with the cleaning company that only environmentally friendly and sustainable products will be used, preferably in refillable packaging.
- We avoid plastic packaging and plastic waste. All employees are committed to using environmentally friendly packaging and avoiding plastic waste.
